Hindi, English

EXPERIENCE

- | | |
|---------------------------|--|
| 01/03/2022
- | Backend Developer
Codebetter(3 months training)
Working as a internship python django programming and working on special project blood bank using:
(Python, Django ,Node Js, ExpressJs, HTML, CSS, MySql, Bootstrap) |
| 01/06/2022 | |
| 01/08/2022
- Currently | Backend Developer
Clumpcoder(Currently Working)
Node js Developer, MongoDB, Deployment, Backend Developer. |

EDUCATION

- | | |
|------|--|
| 2022 | MCA(Master in Computer Application)
Birla Institute of Technology, Mesra Jaipur Campus
79 |
| 2020 | BCA(Bachelor in Computer Application)
Barkatullah University Bhopal
67 |
| 2017 | 12th
Madhya Pradesh Board Of Secondary Education
66 |
| 2015 | 10th
Central Board Of Secondary Education
47 |

PROJECTS

NewsPaper

we are going to develop a simple News app with the help of NodeJS , Express , HTML, CSS and bootstrap, Reactjs, MongoDB.

There are going to be 2 main features in this website search and display news articles And we are going to use Newapi for getting news articles.To start the server automatically we just need to install Nodemon which restart server automatically when any change is detected

npm install -D nodemon

Setup application for developer run and normal run. Just change the Script section with the below code in package.json

External routing is a way of structuring your code so that it stays nice and organized by taking the route implementations outside of the main server file and moving them into a separate router file.

Technology:

Nodejs, Mongodb, Deployment, Reactjs, Gitbash.

Admin Dashboard URL: <http://174.138.101.222:2100>

Vendor Dashboard URL:

<http://174.138.101.222:7001>

Doctor Booking Appointment App

MERN Stack Doctor Appointment Booking Application using React , Redux Toolkit , AntD , Node , MongoDB.

Separate User Interfaces for Users, Admins, Doctors.

JWT Authentication and Password Hashing.

Ant Design Library for UI Components,

Redux Toolkit,

Dynamic home page, serving as the landing page for all users.

Admin and user dashboards.

User login page with professional handling of all kinds of validations.

Ability for a patient to select an appointment and view doctor information, as well as their own appointment information.

Option to select a doctor and view appointment date.

CRUD operations and additional features.

Responsive design with a dynamic header and preloader.
